# FULWOOD'S FROST PROOF CABBAGE PLANTS

CERTIFIED BY THE STATE OF GEORGIA

SEND ALL ORDERS TO P D FULWOOD COMPANY, TIFTON, GA.

READY  
Sept. 1 to June 15

## FROST-PROOF—

These plants will stand temperature as low as 20 degrees. Set plants in open field five weeks earlier than tender hot-bed grown plants.

## FIELD GROWN—

Plants grown in the open field under irrigation to insure you plants when you want them.

## BEST SEED—

We use only the best seed obtainable. Our plants are grown from seed produced by the well-known seed firm, Ferry-Morse Seed Company.

## PRODUCE EARLIER—

Because our plants are hardy, field grown and highest quality plants they can be set earlier and produce two to three weeks earlier than home grown plants.

## PRICES—SEE PAGE 4 FOR PRICES AND CULTURE ON CABBAGE AND COLLARD PLANTS.

### CHARLESTON WAKEFIELD

HEADS 71 DAYS FROM SETTING OUR PLANTS

Desirable for home and market garden. Head broad heart-shaped, 6½ inches broad at base, firm, commonly weighing 4 to 5 pounds.

### COPENHAGEN MARKET

HEADS 66 DAYS FROM SETTING OUR PLANTS

A fine Cabbage. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds.

### GOLDEN ACRE

HEADS 63 DAYS FROM SETTING OUR PLANTS

The earliest round-headed Cabbage, especially valuable for early market and shipping. Heads small and compact; uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller.

### GEORGIA BLUE STEM COLLARD PLANTS

Ready Sept. 1st to June 15th

They grow from 2 to 3 feet tall, with light green, tender leaves on long stems. They withstand heat and cold and have an excellent flavor when cooked. We have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

PRICES ON COLLARD PLANTS SAME AS PRICES  
ON CABBAGE BY PARCEL POST AND EXPRESS.

Guaranteed to be reasonably free of  
aphides and diseases.

COPENHAGEN MARKET

Send money order or check with your order. We will ship C O D on express and Parcel Post orders for your convenience, however, an additional C O D fee must be paid. It will be a saving to you to send payment with your order.

## PRICES ON CABBAGE AND COLLARD PLANTS ON PAGE 4

### FERRY'S ROUND DUTCH

HEADS 71 DAYS FROM SETTING OUR PLANTS

Splendid for home and market garden. Heads compact. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

### GLORY OF ENKHUIZEN

HEADS 76 DAYS FROM SETTING OUR PLANTS

Attractive, round, solid heads, 7 to 8 in. in diameter, and weighing from 5 to 6 lbs. each. They are exceptionally firm and solid. Leaves are finely ribbed, exceedingly tender and of remarkably fine flavor. Makes excellent kraut, slaw, etc.

### ROUND RED DUTCH

HEADS 88 DAYS FROM SETTING OUR PLANTS

(Medium Early). Recommended for shipping. Heads round, solid, about 6 inches in diameter, and weighs 3 to 5 lbs. Deep red. An excellent cabbage for slaw and colorful salads.

Please send all orders to  
P. D. Fulwood Company, Tifton, Georgia

You can't lose with this Guarantee

The Fulwood Partners

#### GUARANTEE

##### 46 Years of Satisfactory Service

We guarantee all of our plants to be exactly as described in this catalog. Fresh pulled day order is shipped. Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify us within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants. We grow our plants from the very best seed obtainable. Nearly all of our seed are bought from the well-known seed firm of Ferry-Morse Seed Company.

We send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall we be responsible for any amount beyond the purchase price.

## YELOWS-RESISTANT VARIETIES CABBAGE PLANTS

MARION MARKET

### CULTURE — CABBAGE, COLLARD AND BROCCOLI PLANTS

These are frost-proof plants and can stand a temperature as low as 20 degrees. Requires about 12 thousand plants to plant one acre and use from one to two thousand pounds of 4-8-6 fertilizer to an acre. Plant in 3 ft. rows, from fourteen to twenty-four inches in the drill. They should be planted up to the bud, but do not cover the bud. Water and press the soil firmly around the plants. Use Sabadilla dust for control of Harlequin bugs. Use five per cent DDT Dust for all types of Cabbage worms.

GLOBE

### PRICES ON CABBAGE AND COLLARD PLANTS

Cabbage Plants tied 50 to bundle

Shipping weight, 18 lbs. to 1,000 plants

The minimum express charges are \$1.80. When ordering less than two thousand plants it would be cheaper to ship them by parcel post.

Send all orders to Tifton, Georgia.

### RESISTANT DETROIT

HEADS 68 DAYS FROM SETTING OUR PLANTS

Introduced as an excellent yellows-resistant strain of Golden Acre. Very popular for early markets.

### MARION MARKET

HEADS 72 DAYS FROM SETTING OUR PLANTS

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Somewhat larger than Copenhagen, but the same shape.

### MEDIUM COPENHAGEN

HEADS 73 DAYS FROM SETTING OUR PLANTS

Developed to meet the need for a later and larger headed type than the regular Golden Acre and Early Copenhagen Market. Yellows Resistance makes this an important market and shipping cabbage. Heads uniformly round, firm and bluish-green in color.

### GLOBE

HEADS 80 DAYS FROM SETTING OUR PLANTS

A Yellows Resistant strain of the Glory of Enkhuizen type.

### WISCONSIN ALL-SEASON

HEADS 90 DAYS FROM SETTING OUR PLANTS

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads weighing 6 to 8 pounds.

If you already have one of our 1955 Catalogs please give one to your neighbor or friend.

Anyone wishing to contract for cabbage or tomato plants in lots of half million or more and be assured of getting your plants at a particular time, write us at our Tifton, Georgia, farm for special prices.

### **YELLOW BERMUDA (Excel 986)**

An extremely early and well bred strain of yellow Bermuda. Bulbs rather small, flat, light yellow; flesh white, soft and mild; tops and necks very small.

### **CRYSTAL WAX BERMUDA**

Probably the best-selling Bermuda Onion on the market, because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

**SWEET SPANISH**

## How to Grow and Care for Onion Plants

These are frost-proof and can stand temperature as low as 20 degrees. Plant approximately sixty thousand plants to an acre in 1½ ft. rows, three to four inches in the drill and about two inches deep. Water and press soil tightly around plants. Dust with 5% DDT for thrips.

Write for prices on lots of a hundred thousand or more.

## FERRY-MORSE SNOWBALL X CAULIFLOWER

Best and most widely used variety. Our Cauliflower plants are hardy and may be set earlier than home-grown plants.

Ready  
January 1st

## CULTURE—CAULIFLOWER PLANTS

Ready Jan. 1 to June 1

These are frost-proof and can stand temperature of twenty degrees. Plant approximately ten thousand plants per acre and be sure to plant so they will head in cool weather as they will not head properly in hot weather. Plant in 3 ft. rows, eighteen inches in drill. Dust same as for Cabbage Plants.

## DECICCO STRAIN BROCCOLI PLANTS

Ready January 1st Till June 1st

An extremely early strain producing large heads ready for market ten days to two weeks ahead of Early Green Sprouting. Also furnishes a high percentage of side shoots or sprouts excellent for bunching or for freezing. Plants medium tall, light green in color, and very productive. Our stock of this strain has been carefully selected for uniformity and can be highly recommended as the best early strain of Broccoli obtainable.

## FULWOOD'S ONION PLANTS

GENUINE FROST PROOF

Ready Oct. 1 to June 1

These are frost-proof and can stand temperature as low as 20 degrees.

Southern-grown Onion plants are no longer an experiment. Large quantities are set out every year and they are rapidly displacing sets. They will grow large, sweet Onions early, and are good keepers. They produce Onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore, we strongly advise you to use our plants instead of sets, whether for the market or home use. Our Onion plants are grown from the very best seed, and will be found true to name. Most Onion plant growers pull Onion plants ahead and store them several weeks before shipping. Such plants cannot produce good crops. Our plants are fresh pulled and shipped the same day and produce better crops.

## SWEET SPANISH (Utah Strain)

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

## PRICES ON ONION PLANTS

Onion Plants are tied 100 to a bunch. Shipping weight is 7 lbs. to the 1,000 plants.

**GREAT LAKES 6238 LETTUCE PLANTS**  
**Ready January 1st to June 1st**

Is resistant to tip burn and stands up well in hot weather. Will stand 20 degrees. Makes head in about 65 to 70 days. Use very rich soil and plant in 2 ft. rows, 12 inches apart. Takes about twenty thousand plants to plant an acre. Should put a light application of nitrate of soda after the plants have reached some size.

**DETROIT DARK RED BEET PLANTS**  
**Ready January 1st to June 1st**

The standard home and market garden strain. Will stand 20 degrees. Plant in 3 ft. rows about six inches apart and use about thirty thousand plants to an acre. Beets are easy to grow and are not seriously affected by insects or diseases.

## CULTURE—BUNCH PORTO RICO SWEET POTATO PLANTS

They should be planted after danger of frost. Use about 1,000 to 1,800 pounds of 4-8-8 per acre. Plant in 3½-foot rows, 12 inches to the drill, and use approximately twelve thousand plants to plant an acre. They should be on a six- or eight-inch bed. These Bunch Porto Rico Sweet Potato Plants can be cultivated without turning vines and they can be dug without having to cut vines, thus saving about fifty percent of the labor. Follow crop rotation.

References: Dun & Bradstreet, Inc., The Blue Book, The Red Book, The Bank of Tifton.

## PRICES ON BUNCH PORTO RICO SWEET POTATO SEED

Ready Jan. 1st to May 1st

By Express, F.O.B. Tifton

Bedding size . . . . . \$7.00 per bushel basket

Write for special prices in large quantities

Sweet potato seed should be ordered only a week before ready to put in a hot bed. They are shipped in bushel baskets and shipment can be made at any time up to May 1st. After that time we will bed all seed not sold. We highly recommend that you bed some of these new Bunch Porto Rico Sweet Potatoes.

## 5 GOOD REASONS TO BUY FULWOOD'S NEW IMPROVED BUNCH POTATOES

1. It has no vines but grows straight up.
2. Digging and cultivating easier.
3. A big labor and time saver.
4. Plants easy to make live.
5. Produces a marketable crop of potatoes three weeks earlier than the regular vine Porto Rico.

The New Improved Bunch Porto Rico Sweet Potato has a better internal color. Is more uniform than the old bunch potato and is a better keeper. High sugar content and excellent for table use.

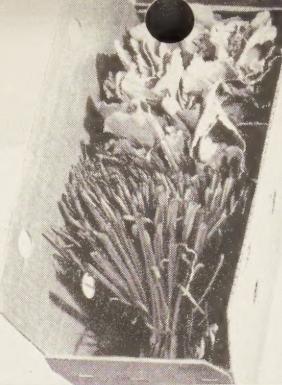

## INSTRUCTIONS FOR BEDDING FULWOOD'S NEW IMPROVED SWEET POTATOES

One bushel of potatoes should pull one thousand plants each pulling for about three consecutive pullings. Choose a well-drained piece of soil on the south side of a building where the sun can hit it all day. Mix approximately three pounds of commercial fertilizer to each square yard of dirt. Place the potatoes far enough apart that they do not touch and cover them with some three to four inches of soil. Keep them moist but not too wet as excessive water makes them cold. You should get your first pulling in approximately six weeks, depending on the weather.

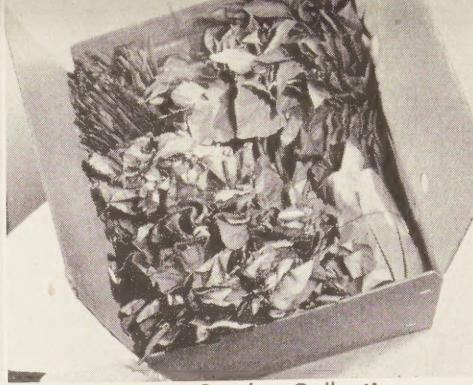

If you desire to make a hot bed for extra early plants write the Georgia Agricultural Extension Service, University of Georgia, at Athens, Georgia, for bulletin No. 533. Our new Bunch Porto Rico Sweet Potato Seed are State inspected, free from disease and certified for shipping to all parts of the country.

## PEPPER PLANTS

*Not Frost-Proof. Ready April 1st to June 15th*

EARLY CALWONDER (Sweet)—Early strain of California Wonder maturing a week or ten days earlier. Plant stocky and sturdy, vigorous, prolific. Fruits 3- and 4-lobed, upright, attractive, smooth, uniform; deep green changing to bright crimson at maturity; thick, sweet and mild. Particularly desirable in area of shorter season. Packs well because of its uniformity.

CALIFORNIA WONDER (Sweet) PEPPER—This is an outstanding medium large variety for market garden and shipping. Plants vigorous and prolific. Fruits four-lobed, chunky, very attractive, smooth, uniform deep green, changing to bright crimson. Flesh thicker than any other variety, sweet and mild. Our stock is definitely superior.

LONG RED CAYENNE (Hot)—A leading sort for use in pickles, for canning and for drying. Plants large, very prolific. Fruits 5 in. long,  $\frac{1}{2}$  in. through; tapered; deep green; becoming bright red; very pungent.

HUNGARIAN YELLOW WAX—(Hot) Very early. Very desirable for home, market, garden and canning. Plants small; heavily productive. Smooth, waxy light yellow, becoming bright red; flesh thick and pungent.

CULTURE — PEPPER PLANTS. Will not stand frost. Should be planted in 3 ft. rows, twenty-four inches apart. Use approximately seven thousand plants to an acre. Peppers, as a rule, are not bothered seriously by insects.

Please send all orders to P. D. Fulwood Company, Tifton, Georgia

**SEE PRICES ON PEPPER PLANTS BELOW**

**If you already have one Catalog please give one to your neighbor or friend.**

## EGGPLANT PLANTS

*Ready March 1st to June 15th*

**NOT FROST-PROOF**

FORT MYERS MARKET (Florida High Bush)—High bush variety, holding fruits well off the ground. Fruits 9 to 10 inches long,  $5\frac{1}{2}$  to  $6\frac{1}{2}$  inches in diameter, broadest near blossom end. Outstanding for deep purplish black color and high gloss.

## CULTURE — EGGPLANT PLANTS

Will not stand any frost. Should be planted in 3 ft. rows, twenty-four inches in the drill. Requires approximately seven thousand plants to plant one acre. For the control of insects and diseases use the same material that is recommended for Tomatoes.

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out.

P. D. FULWOOD CO.  
TIFTON, GA

*Our Booth at 1953 Southern Seedsmen's Convention, Statler Hotel, Washington, D. C.*

**USE FULWOOD'S TOMATO PLANTS AND HAVE  
RIPE TOMATOES THREE WEEKS EARLIER THAN  
FROM HOME GROWN PLANTS**

The fact that the seed are planted here in February and March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. We ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for forty-six years. You will be more than pleased with the early profitable crop they will produce.

**BEST CERTIFIED PLANTS GROWN FROM  
BEST CERTIFIED SEED**

Our Tomato plants, grown on new land from Certified seed, are certified by the State. We grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 50 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

Orders of a dozen plants are packed in a newly designed and rigid pasteboard box. Packed to arrive in good condition.

## MOST POPULAR VARIETIES FOR SHIPPING HOME GARDENS AND CANNING

**VALIANT** Adapted to short-season areas and the early market. Plant sparse and open; fruits large for an early variety, globe shaped and of bright scarlet color.

FRUIT 69 DAYS AFTER SETTING PLANTS

**MARGLOBE** is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

FRUIT 77 DAYS AFTER SETTING PLANTS

**RUTGERS** An excellent all-purpose variety of wide adaptation. Plant large and prolific with thick stems and vigorous growth; partially resistant to fusarium wilt. Fruits globular, bright red, smooth, with thick walls and small seed cells.

FRUIT 75 DAYS AFTER SETTING PLANTS

**THE F<sub>2</sub> OF HYBRID Stokescross No. 5** Production increase of up to 30% is not unusual. Due to its early maturing and a continuing harvest of large, smooth-shouldered fruit, the picking season is extended by at least two weeks. It has high color and rich flavor and it has proven to be extremely profitable on the green wrap and climax basket markets.

FRUIT 85 DAYS AFTER SETTING PLANTS

**CULTURE — TOMATO PLANTS.** Will not stand any frost. Should be planted in 4-foot rows, thirty-six inches apart and use about 3,500 plants to an acre. They should be planted up to the first heavy stem or leaf. For control of early and late blight use Dithane Z-78. For control of any insects use DDT, Calcium Arsenate or Lead Arsenate. For applying follow directions on containers.

## SENSATIONAL F<sub>2</sub> OF HYBRID CLIMBING TOMATO

All the big, red, ripe tomatoes a family of six can eat. They bear until frost. Send \$1.00 for 12 of these large wonderful plants, postage prepaid by us. State when you want shipment made. Free instructions how to grow. Order today.

## **READ WHAT SOME SATISFIED USERS OF FULWOOD PLANTS HAVE WRITTEN - - - -**

"The plants I got last year certainly were the best plants I ever planted and really produced more than any I ever set out. Please send me your price list next year too."—Walter Crandall, Montevideo, Minn.

"I have bought plants from you since 1918. Always found plants like you say and always shipped prompt when called for."—Ira G. Sowers, English, Ind.

"Well pleased with all orders I have received from you people."—G. A. Dermott, New Haven, Conn.

"Received my tomato plants and had to write to you about them. They are sure wonderful plants and in good shape. Thank you."—Thomas McCaffery, Mt. Morris, N. Y.

"I am enclosing a picture of my cabbage patch from plants grown by you and shipped by express out here in the extreme western part of Wyoming, 60 miles from the Railroad. This is typical of the gardens grown from your plants. Every year for over 30 years I have been your regular customer. I want you to know I appreciate the attention you have always given my orders. Thought perhaps you would like to know the success I have always had with your plants."—H. E. Child, Fairview, Wyoming.

---

### **REMARKS:**

---

We buy only the best seed obtainable but weather, soil, and care influence crops, so our liability in all instances is limited to the purchase price of the seeds or plants.
